SIGN IN / SIGN OUT

To sign in to Amadeus, you use a unique code or sign. Your sign is created for you by your local security administrator who can grant attributes to your sign that control the functions you are allowed to use and the level of security you are permitted to have.

The security administrator may also set your sign so that you have to enter a password when you sign in. in this case, after entering your password, you sign in with your sign and a duty code. The duty code is part of the security structure in Amadeus.

Two type of sign modes use in Amadeus are:

1. Sign in to production mode	**JI**
2. Sign in to training mode	**JJ**

Sign-in in to first available area, enter **JI2345XY/GS**

Explanation:

JI	Sign in transaction code
2345XY	Agent sign
/GS	Slash followed by the duty code

Duty codes in Amadeus are:

AS	Agent sell (travel agents only)	PR	Programmer
CE	Customer engineer	RC	Space control
GS	**General sales agent**	**SU**	**Supervisor**
PD	Pre/post departure agent	TR	TTY reject agent

For each terminal there are six work areas. When agents share a terminal, each agent can work independently in a different area. When only one agent uses a terminal, that Agent can use all six work areas. The areas are identified as **A, B, C, D, E**, and **F**.

Options to Sign-In in Production - JI

Sign-in entry to the first available area:	**JI 0000AA / GS**
Sign-in to work area A :	**JI A 0000AA / GS**
Sign-in to multiple areas:	**JI A/B/D/F0000AA / GS**
Sign-in to all work area:	**JI * 0000AA / GS**
Sign-in with password	**JI 0000AA/GS – amadeus1**
Display the status of work areas:	**JD**
Re-display the Sign-in message:	**JB**

Options to Sign-in Practice Training

Sign-in to Practice Training:	**JJ0000AA / GS**

If you have a PNR displayed in a particular area, the system displays the message PNR Present – please finish or ignore. You must ignore or end transacts the PNR before you can sign out.

The Amadeus system scans all signed-in terminals at 120-minute intervals. If you have not performed a transaction on your terminal within the last 120 minutes, the terminal is automatically signed out.

Options to Sign-out – JO

Sign-out of the current active area:	**JO**
Sign-out of the specific area:	**JO B**
Sign-out of multiple work areas, with the same agent:	**JOA/C/F**
Sign-out of all work areas:	**JO ***

Move between Areas:

When you sign in to more than one area, you can move from one to another by entering **JM** Followed by the work area you want to Move to. For example: **JMB**

If you want to move to another area where more than one agent is signed in to the same Terminal, enter **JM** and the last two letters of your sign. For example: **JMXY**

Options to Move the work areas – JM / JX

Sign in to another work area:	**JX C**
Move to a specific work area:	**JM B**
Move to a work area by agent Sign:	**JM AA**
Suspend a work area temporarily:	**JS**

To display Status of the work areas of Sign-In, Enter: **JD**

System Response:

```
ABB244343        DOHQR2900                PSEUDO CITY:AGY

AREA  TM   MOD  SG/DT.LG TIME QCAT ACT.Q  STATUS     NAME
A-IN       PRD  AA/SU.EN 24   30          SIGNED
B-OUT 10   TRN  AA/SU.EN 24               SIGNED      ALI/S MR
C                                        NOT SIGNED
D                                        NOT SIGNED
E                                        NOT SIGNED
F                                        NOT SIGNED
```

Explanation

ABB244343	Terminal number
DOHQR2900	Office id
AGY	Pseudo city code as a travel agency
TM	Time since last transaction in this area
MOD	Mode- PRD for production, or TRN for practice training
SG	Last two characters of agent sign
DT	Duty code
LG	Language code
TIME	System time display (24:24hr clock)(12:12hr clock)
QCAT	Queue category used for agent sign sortation
ACT	Active queue
Q	Active category
Status	Status of PNR (creates, display, modify)
Name	Name of the first passenger entered in the PNR. (This may be Different from the first passenger name displayed in the PNR)

OFFICE PROFILE - PV

Every Amadeus terminal is associated to an office id. The office id is structured as follows:

DOHQR2900

Explanation:

DOH	City or airport code for terminal location	
QR	Corporate code for airline, travel agency, hotel, car, etc…	
2	Corporate qualifier code as travel agency	
	0 - System user airlines **1** - Participating airlines **2,3**- Travel agencies **4** - Hotel provider **5** - Car provider	**6** - Tour provider **7** - Surface provider **8** - Other provider **9** - Wholesaler
900	Office number	

The office profile is the security record which controls many functional features at office level. An office profile record is attached to each existing office id. Many transactions check the office Profile for security reasons. To display your own office profile, enter: **PV**

To display the office profile for another office, enter:

PV / DOHQR2120 (Office Id) **or** **PV / 65209896 (IATA Number)**

"ANC" field of the office profile indicates the office has CIP`s to issue tickets as net Remittance.

Exercise

Note: **Verify that you are not signed to any area**

1) **How do you Sign- in production Area B/D and F?**

_____

2) **How do you Move to Area D?**

_____

3) **Display Your Work status, which area is in first place?**

_____

4) **Write down your office ID (Training Room).**

_____

5) **What is your Terminal Address (Training Room)?**

_____

6) **Which duty code are you working with?**

_____

7) **How do you re-display the daily Sign-in message?**

_____

8) **Describe the different components of an office Identification (DOHQR2900).**

_____

9) **What is the Telephone Number for office DOHQR2120?**

---

10) **How do you Sign-in Practice Training in the first available area?**

---

11) **How do you Sign-Out From current work area?**

---

12) **How do you Sign-in production for all the areas?**

---

13) **How do you Sing-out from Area E?**

---

14) **How do you Sing-out from all area in one entry?**

Answers & Suggested Entries

1) JIB/D/Fnnnnaa/SU (nnnn = Numeric, aa= Alphabets)
2) JMD
3) JD – Area B is first place
4) PV – DOHQR2900
5) JD (ABB..... or 58…….)
6) JD (SU =Supervisor or GS=General Sales Agent)
7) JB
8) City Code + Corporate Code + Corporate Qualifier + Office Number
9) PV/DOHQR2120 (PHO =Field of the Profile)
10) JJ nnnnaa / SU (nnnn = 4 Numeric , aa= 2 Alphabets) JJ0001AA/SU
11) JO
12) JI* nnnnaa/SU (nnnn = 4 Numeric, aa= 2 Alphabets) JI*0001AA/SU
13) JOE
14) JO*

AMADEUS HELP

Online help contains a detailed description of all the entries that can be used in the Amadeus central system. Online help is intended to provide you with the most up to-date support in the use of The Amadeus central system. The information it contains is immediately updated as soon as functional enhancement is made to the system. You can display help Information any time, even before you sign in to the system, by entering: **HELP** or **HE**

You can also access help in the following ways:

- **By Subject index**
- **By Transaction code**
- **By Quick path**

The main subject index provides quick paths to various subjects. For example, the fares subject Contains over 20 pages dealing with various aspects of fares. To access the index for the "Fares" Subject, enter: **HE FARES**

The index provides a list of all the pages contained in that subject, and how to get to each page. For Example, to go to the introduction Page, enter: **GP INT**

You can display help on every transaction code used in the Amadeus system. To request help for A Transaction, enter: **HE (transaction code)**
For example: **HE FQD**

To access help pages, you have a choice of quick path entries, which all begin with: **HE**
You can find some of these quick paths listed in the main help index, or in the alphabetical index, or within a page. For example the quick Paths that can be used to access help on ticketing are:

HE TICKETING
HE TICKET
HE TIC

If you make a mistake in an entry, the system displays an error message. If this happens, you can Display online help for the transaction Code that you entered incorrectly by entering: **HE/**

If your error involves a multiple element entry, Amadeus displays the help page for the first Transaction code used in the Entry. The information in a help page usually begins with an example of the basic entry you can use for that application.

A table of contents follows which lists the sections in the page and indicates how to display them. For example, to move to the section starting on line 106, enter: **MS106**

Options for Help Pages – HE

Help on Help :	**HE HE**
Help index by letter:	**HE A**
Help on a specific transaction:	**HE NM**
Help on a specific topic:	**HE PNR NAME**
Step-by-step instruction for common tasks:	**HE STEPS**
Help on the last transaction entered:	**HE/**
List of updates to online help:	**HE UPDATES**

AMADEUS INFORMATION SYSTEM - AIS

AIS is a central source of reference information available to all Amadeus users. Some parts of AIS are updated by Amadeus, others by External providers.

You can display AIS pages at any time, even when you are not signed into Amadeus. If you are working in Amadeus, you can display AIS and then return to your previous activity.

You can move to the page you want to display by using special short commands called quick paths. For example, to access the Qatar Airways page enters: **GG AIR QR**

To display main index of AIS topic enter: **GG AIS**

Options to Display Amadeus Information Pages

Display main topic list:	**GG AIS**
Airline in Amadeus: Access Level:	**GG PCAL ACC**
Airline in Amadeus: Function Levels:	**GG PCAL FUN**
List of carriers with origin country:	**GG PCAL AIR**
Amadeus functions supported by a specific airline:	**GG PCA LH**
List of airline having their own AIS pages:	**GG AIR AIS**
Information provided by a specific airline:	**GG AIR QR**
Airline's city information:	**GG AIR LH NYC**
Information about Amadeus Cars:	**GG CAR**
Information on a specific car company:	**GG CAR ZI**
Information about Amadeus Hotels:	**GG HTL**
Information on a specific hotel chain:	**GG HTL SI**
Product announcements in Amadeus:	**GG NEWS**
Weather forecast for a specific city:	**GG WEA JNB**
Information on specific Airport:	**GG APT CDG**
Information on a specific country:	**GG COU QA**
Information from a specific Amadeus **ACO**:	**GG AMA QA**
Information on Amadeus Input & Output codes:	**GG CODE**

Exercise

1) **What is the category, the subject and the page in following transaction: GGAIREKBAGS?**

---

2) **On the day of your departure, can you leave your suitcase at the airport for a few hours and go to Nice (NCE) city by bus?**

---

3) **What is the weather like in Tokyo (TYO) for this week?**

---

4) **What is the entry to find out Participating carrier in Amadeus, for example Gulf Air (GF)?**

---

5) **What is the entry to find out Amadeus Qatar (QA) AIS pages?**

---

6) **How do you find out Country 2-letters ISO codes?**

Answers & Suggested Entries

1) GG - Transaction Code
   AIR - Category
   EK – Subject
   BAGS – Page

2) GGAPTNCE
   GP4 for check the Facilities
   GP5 for check Surface Transportation

3) GGWEATYO

4) GGPCAGF

5) GGAMAQA

6) DC Country Name or GGCOUA (A= First Letter of country Name)

ENCODING AND DECODING

Amadeus uses codes to represent locations, companies, and equipment in the entries you use in Amadeus and the displays that are Returned to you .Therefore you need to be able to interpret the Codes you see and use.

The encode and decode transactions allow you to:

1- Display the code for a full name that you enter
2- Display the full name for a code that you enter
3- In some cases, display a full list of codes

You can encode and decode:

Locations (Countries, Cities, States)
Companies (Airlines, Cars, Hotels, Rail)
Equipment (Cars, Aircraft)

To Encode an IATA Name:	**DAN (IATA Name)**
Examples:	**DAN London** **DAN Heathrow**
To Decode an IATA Code:	**DAC (IATA Code)**
Examples:	**DAC LON** **DAC LHR**

With 'DAN' (but not 'DAC') you can restrict the display by:

1- Country code or country / state code.
2- Location type, as defined in the legend on DAN displays (A:ARPT B:BUS C:CITY, Etc)

Options to Find Encode and Decode

Encode for Location:	**DAN RIYADH**
Encode/Decode a country:	**DC QATAR**
Encode/Decode a state:	**DNS WASHINGTON**
Encode/Decode an airline:	**DNA EMIRATES**
Encode/Decode an aircraft:	**DNE 747**
Encode/Decode a Hotel:	**DNH MARRIOTT**
Encode/Decode a car company:	**DNC AVIS**
Decode City/Airport from three letters code:	**DAC LAX**
List all Airports for City:	**DB NYC**
Decode an airline 2 letter code:	**DNA GF**
Decode an airline number:	**DNA 072**
List the states for a country:	**DNS US**

CONVERSION

You can add, multiply, subtract, and divide, as follows:

To Do This	Symbol	Example
Add	;	DF120;25
Subtract	-	DF30-20
Multiply	*	DF30*3
Divide	/	DF20/2

You can calculate the base fare, total fare, or sales tax by adding a percentage to the base fare, or subtracting a percentage from the total. For both adding and subtracting, the entry is the same: **DF370P10**

You can use the **DD** transaction as:

A calendar:	To display days of the week, dates, and the number of days between different dates.
A clock:	To display the time at different locations, time differences, and elapsed Flight times.

To display the day of the week for a specific date in the current year, enter, for example: **DD31DEC**

System response:

MON31DEC07

To display the day of the week for a specific date in another year, specify the year, enter: **DD 02FEB 05**

System response:

WED02FEB05

To display the system date, enter: **DD**

System response:

System Time is **0946/0946A** on **THU15MAR07**

You can display the following times:

1- The current time for anywhere in the world
2- The time difference between any two locations
3- The time in one city relative to another
4- The elapsed flying time between two cities

Current time in another city and difference between that city and your own, enter: **DD LON**
Time in another city compared to a specified time to another city, enter: **DDLON1800/NYC**
To display the elapsed flying time between two cities, enter for example: **DDPAR1335/LAX1720**

Explanation:

DD	Transaction code
PAR	Code for city of departure
1335	Departure time
/	Separator
LAX	Code for city of arrival
1720	Arrival time

To display the date for a specific city, enter, for example: **DD SYD**

System response:

```
SYD Time Is 2049/ 849P on FRI16MAR07
SYD is 10HRS 00MIN Later
```

To display a date a specified number of days after a given date, enter, for example: **DD25JAN/30**

System response:

```
SAT24FEB07
```

To display a date a specified number of days before a given date, enter, for example: **DD25FEB/- 30**

System response:

```
FRI26JAN07
```

You can combine the last two entry types to calculate a series of dates before and/or after the Specified date. For example, enter: **DD18FEB/-7/7/30**

System response:

```
SUN11FEB06/SUN25NOV06/TUE20MAR06
```

To display the number of days between two dates, enter, for example: **DD14JUL/25DEC**

System response:

```
164
```

Options

Calculate Percentage:	**DF 950 P 10**
Calculate time Difference between two Cities:	**DD PAR/NYC**
Time for Specific City:	**DD SYD**
Compare Two Cities Time:	**DDNYC1800/LON**
Number of Days after Date:	**DD12DEC/27**
Number of Days before Date:	**DD12DEC/-14**
Day of the week for the Date:	**DD25DEC**

Exercise

1) **How many cities in the World are called London?**

---

2) **How many cities in the world are having an airport called London?**

---

3) **How many Airports in London (LON) city?**

---

4) **Display all cities having an airport and called Paris in the USA?**

---

5) **If you want to go to Washington DC in the US, which code are you going to use to request a flight availability display?**

---

6) **If you want to go to Antibes, in which airport do you need to land?**

---

7) **What is the local currency code for South Africa?**

---

8) **What is the name of the state SK in Canada?**

---

9) **What is the name and the country of origin of airline B2?**

Answers & Suggested Entries

1) DAN LONDON and DAN LONDON/S (Total 8)
2) DAN LONDON/A (Total 2)
3) DAC LON (Total 6)
4) DAN PARIS/US
5) DAN WASHINGTON (WAS =City Code)
6) DAN ANTIBES Than DAN ANTIBES/S (Nice is Closet Airport)
7) DC SOUTH AFRICA (ZAR is South Africa Rand)
8) DNS CASK (2Letter Country Code & 2 Letter State Code)
9) DNAB2 (Belavia) Than GGPCALAIRB (Belarus is Country)

Exercise

1) **If Fare of QAR 950.00 includes a 10% tax, what is the base fare amount?**

_____

2) **On which day of the week falls your Birthday this year?**

_____

3) **Your customer is flying on Dcember15TH. You need to issue the ticket at least 10 days in advance and fare allows a maximum stay of 45 days. Before which date do you need to issue the ticket and book the Return flight?**

_____

4) **When it is 18h00 in Tokyo (TYO), what time is it in Miami (MIA), what is the time difference between both cities?**

_____

5) **If you rent a car in the US, the maximum speed authorized on a motorway is 55 Miles an hour. How many kilometers an hour is this?**

_____

6) **In France, in May, the Temperature is around 20 degrees Celsius. To how many Fahrenheit does this corresponds?**

_____

Answers & Suggested Entries

1) DF 950 P 10
2) DD ddmmm (dd = 2 Numeric Date, mmm=3 Alphabets of Month)
3) DD15DEC/-10/45
4) DDTYO1800/MIA
5) DKMK55
6) DKCF20

AMADEUS AIR

Amadeus Air provides airline Schedule and availability information for flight that have seats available for sale. Availability and schedule displays contain flights for airlines that have a sales agreement with Amadeus.

Airlines can have the following access levels with Amadeus:

/ Amadeus access: both Amadeus access update and Amadeus access sell.

: Amadeus Access Update: provides real-time schedule updates and, when Numeric Availability' is supported, last Availability from Amadeus principal displays.

. Amadeus Access Sell: fully secured sale (HK) for each seat.

* Direct Access: real-time link to airline system to display accurate availability

(Blank) Standard Access: flight availability and schedules updated weekly. Message sent to Airline at end of transaction.

AVAILABILITY:

An Amadeus availability display shows all flights with at least one seat available for sale or Waitlist, for all airlines which have sales agreement with Amadeus. Based on the transaction code and parameters you use to request the display.

SCHEDULE:

An Amadeus schedule display shows all flights operated by all airlines who submit schedule Information to Amadeus, for airlines that have a sales agreement with Amadeus, availability status codes are shown for each class of service, regardless of whether seats are Available, availability Status codes are shown for each class of service, regardless of whether seats are available. The schedule display also shown flown flights availability and schedule displays include flights up To 361days in the future (less for some airlines) And up to 3 days in the past are stored in the system. Flights in the past are shown in an availability display without availability status Codes.

Transaction code for a neutral availability (AN) or neutral schedule (SN) display. To request A different type of display, replace AN or SN with any of the following:

AA or SA	For A display by arrival time
AD or SD	For A display by departure time
AE or SE	For A display by elapsed travel time

BY NEUTRAL DISPLAY:

A neutral display **(AN or SN)** shows flights departing up to one hour before the departure time you specify. If you do not specify A time, the display includes flights departing up to one hour before The current time (for the current date) or flights departing from 0000 (midnight) on The day of departure (for a future date).

BY DEPARTURE TIME DISPLAY:

A display by departure time **(AD or SD)** shows flights in order of departure and starts with flights departing up to one hour before the time you specify. If you do not specify a time, the display starts with flights departing up to one hour before the current time (for the current date) or flights departing from 0000 (mid night) on the day of departure (for a future date).

BY ARRIVAL TIME DISPLAY:

A display by arrival time **(AA or SA)** shows flights in order of arrival and starts with flights arriving up To one hour before the time you specify. If you do not specify a time, the display starts with flights arriving up one hour before the current time (for the current date) or flights arriving from 0000 (Mid night) on the day of arrival (for a future date).

BY ELAPSED TRAVEL TIME DISPLAY:

A display by elapsed travel time **(AE or SE)** shows flights in the order determined by the following calculation: the actual elapsed flight Time (including stopover and connecting time) plus the time between the departure time you specify and the actual departure time of the flight. For example: Assuming you specify a departure time of 1600, the following table shows the order in which four flights would appear on the availability or schedule display.

Flight Departs	Elapsed Flight time	Elapsed time From 1600	Display Order
1630	5hrs 45min	6hrs 15min	Second
1700	5hrs	6hrs	First
1800	4hrs 30min	6hrs 30min	Third
1900	4hrs	7hrs	Fourth

The order of flights described below applies to all types of availability and schedule display for European Union regulations except USA.

1. **Non-stop flights, by departure time (earliest to latest)**
2. **Direct flights, by elapsed flight time (shortest to longest)**
3. **Flights with an equipment change en route and connections by elapsed flight time**

Two and three segment connections, online connections, and interline connections are not sorted. European Union regulations apply in most Amadeus market except the US ACO.

OPTIONS:

To request an availability or schedule display

For One-way routing, enter for example: **AN 11JUL DOHDXB**
SN 11JUL DOHDXB

For Specific Time, Enter for Example: **AN 11JUL DOHDXB 0900**
SN 11JUL DOHDXB 0900

For Specific Carrier, Enter for Example **AN 11JUL DOHDXB / A QR**
SN 11JUL DOHDXB / A QR

For Specific Class, Enter for Example: **AN 11JUL DOHDXB / C F**
SN 11JUL DOHDXB / C F

For Specific Cabin, Enter for Example: **AN 11JUL DOHDXB / K F**
SN 11JUL DOHDXB / K F

For Specific Transit point (Via), Enter for Example: **AN 11JUL DOHDXB / X AUH**
SN 11JUL DOHDXB / X AUH

One or more than one option combination, Enter for Example:
AN 11JUL DOHDXB 0900/ X AUH / A GF / C F
SN 11JUL DOHDXB 0900/ X AUH / A GF / C F

Direct Access

Direct access provides you with direct access to the reservation systems of major airlines. Using standard Amadeus entries, you can obtain current information on availability of seats through a real Time link between Amadeus and the airline. By accessing the airline's reservation system directly, you can see the last seat available on a flight, without the airline rejecting the booking after end transaction. Flights can be sold even if they are on request, or show a waitlist status on other types of Amadeus display. You can see up to maximum of 26 classes of service in a direct access display. All Amadeus users can directly access the inventory systems of the Airlines that have a direct access agreement with Amadeus. Link between Amadeus and the airline inventory system for 3-minutes only. When you know that the airline has a direct access agreement with Amadeus, enter the number **1** Followed by the two-letter airline code.
You can only use the availability-by-departure time **(AD)** Transaction code. Enter, for example:
1EKAD12SEPDOHDXB

or

Display Amadeus availability and apply change entry for specific line number of airline required. For example EK846 on line number 4 of Amadeus Display Screen, Enter: **ACL4**

System Response:

```
21   EK842      F9   Y9   B9   Q9   K9   DOH DXB 0940      0940     0 777
                V9   T9   H9   S9
22   EK844      F9   Y9   B9   Q9   K9   DOH DXB 1300      1300     0 777
                V9   T9   H9   S9
```

Direct Access Availability Starts with Line 21

Scrolling entries are used to request additional displays within the same period of availability or schedule display.

MD or MB	Moves To A Subsequent Screen
MU or MT	Moves To A Preceding Screen
MD	Move Down
MB	Move Bottom
MU	Move Up
MT	Move Top
MN	Moves Next Day
MY	Moves Previous Day
MPAN	Redisplay Last Availability cleared Screen
MPSN	Redisplay Last Schedule Cleared Screen

Modifications to a current display can be made by entering the transaction code for change – AC (availability change) or SC (schedule change) combined with the new information for the area to be modified. Multiple changes can be combined in a single transaction,
If they are entered in the following sequence:

Date Period	AC **15JUN**	or	SC **15JUN**
Only Origin City	AC **MUC**	or	SC **MUC**
Only Destination City	AC **//MIL**	or	SC**//MIL**
City Pair	AC **MUCMIL**	or	SC **MUCMIL**
Specific Carrier	AC **/AEK**	or	SC **/AEK**
After 2 Days	AC **2**	or	SC **2**
Before 3 Days	AC **-3**	or	SC **-3**

TIMETABLE

Timetable displays can be requested using the following transaction codes:

TA	By Arrival Time Order
TD	By Departure Time Order
TE	By Elapsed Time Order
TN	By Neutral Order

Options:

Weekly timetable	**TNDOHCAS**
Weekly timetable from specific date	**TN01JULDOHCAS**
Weekly timetable for specific carrier	**TNDOHCAS/AQR**

FLIGHT INFORMATION:

FLIFO is flight information stored and displayed in Amadeus. It provides the most up-to-date planned and operational information about a particular flight both before and after departure. The information available in FLIFO is provided to Amadeus by the airline.

Flight information is available for airlines that have a sales agreement with Amadeus. If you request FLIFO for a flight operated by another Airline, the system displays an error message telling you that flight information is not available.

You can display FLIFO by specifying the flight number, or with short-cut entries from the PNR, Availability, or Schedule displays. This entry is used to display the latest known operational details of the flight.

To request flight information for a specific flight today, enter, for example: **DO QR620**

For a specific date, enter for example: **DO QR620/12JUL**

Options:

From availability / schedule displayed:	**DO2**
From PNR segment:	**DO2**
By Flight Information	**DOBA124/12JAN**

EXERCISE

1) **What are the two main differences between an availability display and a schedule display?**

2) **What is the entry to display all Non-participating carriers between Chicago (CHI) and Detroit (DTT) on December 12th?**

3) **The flights in Amadeus display are always ranked in a specific order For European Union Display. What is it?**

4) **How long does it take before you loose the link with an airline's own system after having requested a Direct Access display?**

5) **Where can you find information about the frequency of flights for a given city pair?**

6) **Give the Amadeus short-cut entry to perform the following requests:**
   (a) **Change AN display to request GF flights only.**
   (b) **Change AN display to request Return Flight 3 Days later**

7) **Where can we find information about the type of meal served by Class of service?**

8) **Do you see last-seat availability on the display shown below? Where? Which other screen would you look at to find out the access levels supported by GF?**

```
1  GF 531  F7 A7 J7 C7 Y7 H7 K7 / DOH   BAH    0900    0940   0.320       0:40
           M7 L7 Q7 V7 X7
```

Answers & Suggested Entries

1) In a Schedule display you find fully booked flight and classes you can also find Airline with no sales agreement with Amadeus if you specify option/AXX (XX= airline code) or /AYY in the end of your entry.

2) SN12DECCHIDTT/AYY

3) To comply with
   Non-Stop Flights
   Direct Flights
   Connections Flights

4) 3 Minutes (Airline inventory allow protocol to protocol link)

5) In a Time Table Display (TN)

6) (a) AC/AGF
   (b) ACR3

7) In a flight information Display (DO)

8) Yes, There is a "/ " before the departure city.
   The other Screen get the information about the GF level of access is (GGPCAGF)

PASSENGER NAME RECORD (PNR)

A passenger name record (PNR) contains the details of a passenger's reservation, and other information related to passenger's trip. Each PNR consists of a collection of information items called elements. A PNR can contain a maximum of 999 elements but it must contain the following five mandatory elements:

- Name element	a passenger name
- Itinerary element	a booking for a flight or other service
- Contact element	a telephone number, or contact information for the person making the booking
- Ticketing element	an indication of the arrangements for issuing a ticket for the Booking
- Received from element	The Name of the person who has mad the booking

After you have entered the five mandatory elements, you can use an end transaction entry to file the record in The Amadeus central system. When a PNR is filed in the system, it is assigned a six- character code called a record locator which you can use to retrieve The PNR

NAME:

The Name Entry Is Used:

- **To Insert Names for Individual Passengers into A PNR during Creation**
- **To Add Individual Name Elements for a Group**

At least one name element is mandatory for the creation of a PNR and to end transaction on a retrieved PNR.

1 - Single Passenger

To enter a name element for a single passenger, you enter the transaction code NM followed by followed by the passenger's surname, a slash, and the given name or initial. You can also add a title, preceded by a space. **NM1**ALNASSAR/JAFFER **MR**

Response:

```
1. ALNASSAR/JAFFER MR
```

Note: The surname must contain a minimum of two characters and can contain up to 59 Characters. The system uses the passenger type codes for fare pricing and to create OSI or SSR elements that identify the status of certain passengers.

In general, you can enter only one type code per passenger. The exceptions are the infant and id codes, which you can combine with other type codes. You enter the passenger type code between parentheses immediately after the first name or title.

Here is an Example Entry: **NM1JONES/TOM(YTH)**

The passenger type code YTH indicates that the passenger is a youth.
For child passengers between the ages of 2 and 11, you must use the type code **CHD**. When you enter **CHD**, the system generates an **OSI** element to inform the airline that the passenger is a child and is to be treated accordingly, enter, For example: **NM1ALEMADI/YASIN(CHD)**

Response:

```
1. ALEMADI/YASIN(CHD)
2 OSI YY 1CHD
```

Multiple Passengers with Same Surname:

If several passengers with the same surname are travelling together, then you only need to enter the surname once. This is useful for Family parties, etc.

Enter **NM** followed by the number of passengers sharing the surname, followed by a slash and the given name and title of each Passenger, with each passenger separated by a slash.
For example, enter: **NM3ALNASSAR/JAFFER MR/MARIYUM MRS/NOORA MISS**

Response:

```
1.ALNASSAR/JAFFER MR    2.ALNASSAR/MARIYUM MRS    3.ALNASSAR/NOORA MISS
```

Multiple Passengers with Different Surnames:

Multiple surnames, with the individual passenger name for each, can be entered in a single entry. The transaction code NM is required only at the beginning of the entry or we can enter multiple surnames with using; in the end of every title.

Entry: **NM1ALSAAD/BADER MR1ALNASSAR/JAFFER MR**
or
NM1ALSAAD/BADER MR;NM1ALNASSAR/JAFFER MR

Response:

```
1.ALNASSAR/JAFFER MR    2.ALSAAD/BADER MR
```

Passenger with Infant:

There is a special passenger type code (**INF**) for infants travelling with an adult passenger.
This type code is exceptional as it is entered with the accompanying adult passenger.

1- Infant with Same Family Name:

Entry: **NM1ALEMADI/NOORA MRS(INF/ NASREEN/16)**

Response:

```
1.ALEMADI/NOORA MRS(INF/NASREEN/16)
3 SSR INFT EK NN1 ALEMADI/NASREEN 16MTHS/S2
```

2- Infant with Different Family Name:

Entry: **NM1ALEMADI/NOORA MRS(INFALNASSAR/NASREEN/16)**

Response:

```
1.ALEMADI/NOORA MRS(INFALNASSAR/NASREEN/16)
3 SSR INFT EK NN1 ALNASSAR/NASREEN 16MTHS/S2
```

Options:

Single Passenger:	**NM1ALKULAIFI/ALI MR**
Multi Passengers, same surname:	**NM2ALKULAIFI/ALI MR/NORA MRS**
Multi Passengers, different Surname:	**NM1ALKULAIFI/ALIMR;NM1ALKULAIFI/NORSMRS**
Child Passenger:	**NM1ALKULAIFI/JAFFER MR (CHD)**
Infant, same surname as Adult:	**NM1ALKULAIFI /NORA MRS (INF/NASIR/10)**
Infant, different surname as Adult:	**NM1ALKULAIFI/NORAMRS (INFALNAIMI/NASIR/10)**

SELL:

An itinerary element can be a flight, hotel, car or ground transportation element. Each individual itinerary element is called segment. A PNR can contain up to99 itinerary elements in the PNR, the itinerary element follows the Name, and is number consecutively.

- Direct sell (long entry)
- Sell from availability (short entry)

Each time you make a sell entry, the system displays the response as an element in the PNR with the appropriate action code for the Airline's sales agreement with Amadeus.

When you know all the details for a specific flight, you can book a seat using a long sell entry. A long sell entry is also called a direct sell entry. The long sell entry does not refer to an availability or schedule.**SSQR001B10DECDOHLHR4** or **SSQR001B10DECDOHLHRNN4**

Explanation:

SS	Segment Sell Transaction Code
QR001	Airline Code and Flight Number
B	Class of Service
10DEC	Departure Date
DOHLHR	Origin and Destination Airport Codes
4 or NN4	Number of Seats Requested

When you have availability or schedule display on your screen, you can make a short Sell segment entry directly from the display.

The availability display below illustrates the short sell Entry:

```
** AMADEUS AVAILABILITY - AN ** LHR HEATHROW.GB                98 SU 12DEC 0000
** ** IC/HI/CP **  ** GR8 RATES AT SELECTED LONDON HOTELS **
** ** ALL RATES IN GBP*PER ROOM/PER NIGHT **    >GGHTL6CNEWS

 1   QR 005  F6 A5 J9 D9 I0 Y9 B9 /DOH   LHR 3      1150    1640   0/332       7:50
                   L9 Q9 K9 T9 V9 W9 H0
 2   QR 001  F9 A9 J9 D9 I0 Y9 B9 /DOH   LHR 3      1300    1750   0/332      7:50
                   L9 Q9 K9 T9 V9 W0 H0
```

To sell one **F** class seat for **QR001**, Enter: **SS1F2**

Explanation:

SS	Segment Sell Transaction Code
1	Number of Seats
F	Class of Service
2	Availability or Schedule Line Number

Here are some examples of entries you can make when you want to book connecting flight in a different class of service:

1- Book 3 seats in **M** class on the first segment and **C** class on the second segment, both segments on line **4** of availability display, Enter: **SS3MC4**

2- Book 3 seats in **M** class on the first segment, **C** class on the second segment and **F** class for third segment, all segments on line **4** of an availability Display, Enter: **SS3MCF4**

CONTACT - AP

A PNR must include a contact element (to indicate where passengers can be contacted) before you make an end of transaction during PNR creation or after PNR retrieval. Every passenger in the PNR must be covered by a contact element. A PNR can contain a maximum Of 127 contact elements & the contact element consists of the transaction code AP, followed by 1-90 characters of free-flow text. For example, enter: **AP DOH 4667579 – H**

Explanation:

AP	Contact Transaction Code
DOH	City code of the Telephone Number
4667579	Telephone Number
-H	Dash, followed by the telephone location indicator

In addition to telephone contact elements, you can enter e-mail contact elements.
For e-mail: **APE- abc@abc.com**

TICKET ARRANGEMENT:

A ticketing arrangement element, also referred to as a TK element must be included in the PNR to indicate the status of the ticket Issuance for all passengers in the PNR. The ticket arrangement element must be present in a newly created or retrieved PNR before end of transaction is accepted by the system. The maximum number of active ticketing arrangement elements for each PNR is 127.

Basic entry for ticket arrangement: **TKOK**

Where TK is transaction code for ticket arrangement

OK	Tickets have been issued (no queue placement)
TL	Ticket time limit is used to request ticket issuance on a specific date and time, and In your office or in another location. Automatic queue placement to queue 8, Category C1.
XL	This identifier enables the itinerary to be automatically cancelled when the date entered in the TK Element is reached. THE system automatically cancels the Itinerary (XI) and ends transaction (ET). The cancellation takes place at local date and time.

RECEIVED FROM:

The received from (RF) element indicates who has instructed you to make or update a reservation. The RF Element is mandatory. After you create or modify a PNR, you cannot file the PNR unless an RF element is Present. The RF element only appears in the PNR during the current session and is recorded in PNR history when the PNR is filed at the end of transaction.

The basic received from entry consists of the transaction code RF followed by the name of the responsible person. You can enter the name in any format. The RF element can contain a maximum of 69 characters, including spaces.

Basic Entry for Received From: **RF MR ALNASSAR**

Explanation:

RF	Received from transaction code
MR ALNASSAR	Free flow text

END TRANSACTION:

When you have entered the five mandatory elements to create a PNR, you must end transaction to the record in the system. To file and close the PNR, enter: **ET**

System Response:

END OF TRANSACTION COMPLETE - (6- Character Record Locator)

To end transaction and redisplay the PNR on your screen, enter: **ER**

With one entry you can end transaction and change advice codes in the PNR. This entry changes advice codes in the Air, Hotel, Car, and auxiliary segments, and SSR elements.

Elements that contain the codes NO, UN, and UC are transferred to the history section of the PNR. In addition, associated elements, such as the FA or FB element, are updated or removed from the PNR as appropriate. Enter: **ETK**

With one entry you can end transaction and change advice codes, and redisplay the PNR. This entry changes advice codes in the Air, Hotel, Car, and auxiliary segments, and SSR elements.

Elements that contain the codes NO, UN, And UC are transferred to the history section of the PNR. In addition, associated Elements, such as the FA or FB element, are updated or removed From the PNR as appropriate. Enter: **ERK**

Note:

Please cancel all ''HX'' segments from the Amadeus PNR. If failed to remove ''HX'' segments from the PNR, airline may raised ADM'S to travel agency.

IGNORE:

The ignore entry disregards all entries made during the current PNR session. During PNR creation, the ignore entry removes any record of the PNR from the system. Any entries that are on the screen remain until the screen is cleared. Basic Entry : **IG**

System Response:

-IGNORED-	**For a newly created PNR**
-IGNORED-ABC123	**For a retrieved PNR**

When you want to ignore current updates to an existing PNR and have the PNR redisplay on your screen in its original form without any modification, enter: **IR**

CANCELING

PNR elements are divided in to three categories:

- **Name Elements**
- **Flight Segments**
- **Other**

You make the cancel entry (XE) to move single or multiple active elements from the face of a PNR to PNR history. When you cancel an itinerary element, a message is sent to the vendor(Air Line, Car, Hotel, etc.).

To cancel Element on line 2 , enter: **XE 2**
You make the cancel itinerary entry (XI) to cancel all active itinerary elements of the PNR: **XI**
You cancel Seat request element on the line 6: **SX6**

RETRIEVAL

The retrieve PNR transaction is used to retrieve and display an active PNR or to redisplay a PNR during the current session.

A travel agency can retrieve:

- **All PNRS for which the agency or another office defined by security has responsibility**
- **Containing PTAS that it created**
- **That other offices in the same chain created**

Retrieving A PNR by Record Locator:

All agents can retrieve PNRS for which they are responsible, or for which an **EOS** agreement is in place, by entering: **RTW4RQL4**

Explanation:

RT	Transaction Code
W4RQL4	Record Locator

This entry is limited to the office with responsibility for the PNR. For an exact search, enter the full name. For example: **RT/SMITH/J**

Explanation:

RT	Transaction Code
/SMITH/J	Slash followed by name or group name

Retrieve PNR For Partial Name or Alphabet, Enter: **RT/S**

Explanation:

RT	Transaction code
/S	Slash followed by partial name or alphabet

Retrieving A PNR from A Name List:

To display a PNR from a list displayed by another retrieval entry, enter: **RT2** (2 Is the Reference Number)

To redisplay the list before or after modifying the displayed PNR, enter: **RT0**

Retrieving A PNR by Flight Number & Name:

To Display a PNR by Flight Number and Name, Enter: **RTQR001/23DEC-ALNASSAR**

Explanation:

RT	Retriever transaction code
QR001	Flight number
/23DEC	Slash followed by date
-ALNASSAR	Dash followed by passenger name

Retrieving a PNR by Flight:

The PNRS that have been created for a specific flight on a specified date. Only the PNRS that you are allowed to retrieve individually appear in the list. To list all PNRS for A flight on a Specific date, enter the date after the flight number. For example: **LM/BA902/10JUN/LHRFRA**

Explanation:

LM	Transaction Code
/BA902	Slash followed by the airline code and flight number
/10JUN	Slash followed by the date
LHRFRA	Origin and Destination Airport codes

Retrieving A PNR from A Search by Flight Display:

You can retrieve A PNR from A search by flight display using the transaction code **LM** followed by the line number for the PNR in the Display, for example: **LM002**

To redisplay the search by flight display, enter: **LM0**

STEPS TO CREATE A PNR

Following are the steps to create a PNR.

1-Display the Availability (AN/AD/AA/AE):

System Response:

```
AN15JUNDOHDXB
** AMADEUS AVAILABILITY - AN ** DXB DUBAI.AE                    130 FR 15JUN 0000

 1   QR 102  F9 P9 A5 Y9 B9 L9 M9 /DOH   DXB 1  0050    0255  E0/320       1:05
             Q9 K9 H9 V9 T9 W9
 2   EK 848  F4 A4 J4 C4 Y4 W4 M4  DOH   DXB 1  0345    0545  E0/332       1:00
             B4 K4 Q4 H4 L4 T4 V4
 3   QR 100  F9 P9 A0 Y9 B9 L9 M9 /DOH   DXB 1  0755    1000  E0/320       1:05
             Q9 K9 H9 V9
 4   EK 842  F4 A4 J4 C4 Y4 W4 M4  DOH   DXB 1  0945    1145  E0/332       1:00
             B4 K4 Q4 H4 L4 T4 V4
```

2-Sell the Air Segment/Segments (SS):

Sell the Air segment / segments from the availability display, For Example:
Sell ''3'' seats on ''EK848'' (Line Number 2 of availability display) in ''V'' class.
Entry: SS3V2

System Response:

```
RP/DOH1A0980/
  1  EK 848 V 15JUN 5 DOHDXB DK3  0345 0545  15JUN  E  0 332 M
     NON SMOKING FLIGHT LEG
     SEE RTSVC
```

3-Enter the Name / Names (NM):

Single Name: NM1ALNASSAR/KHALIFA MR
Same Family Name for 2 Passengers: NM2ALNASSAR/KHALIFA MR/MARIAM MRS
Child Name: NM1ALNASSAR/THAMER MR(CHD)
Infant Family Name as Adult: NM1ALNASSAR/MARIAM MRS(INF/NOORA/05)
Infant Family Name different from Adult: NM1ALNASSAR/MARIAM MRS(INFSHEIKHA/NOORA/05)

System Response:

```
RP/DOH1A0980/
  1.ALNASSAR/THAMER MR(CHD)
  2.ALNASSAR/MARIAM MRS(INF/NOORA/05)   3.ALNASSAR/KHALIFA MR
  4  EK 848 V 15JUN 5 DOHDXB DK3  0345 0545  15JUN  E  0 332 M
     NON SMOKING FLIGHT LEG
     SEE RTSVC
  5 SSR INFT EK NN1 ALNASSAR/NOORA 05MTHS/S4/P2
  6 OSI YY 1CHD/P1
```

4-Enter the Contact details (AP / APE):

Telephone contact of passenger: AP DOH 4667579 B C/O ZAFAR
Travel Agency Contact: AP **(Press ENTER key)**
E-mail contact: APE-abc@abc.com

System Response:

```
RP/DOH1A0980/

OTHER SERVICE INFORMATION

An OSI (other service information) element contains special information regarding a passenger or passengers in the PNR that is sent to the airlines that appear in the itinerary. An OSI element is not a service request and does not require confirmation from the airline.

The mandatory items in an OSI entry are the transaction code **OS** and the two-letter code of the airline to which the information is to be sent. If the OSI element is for all airlines in the itinerary enter **YY** as A common code.

The entry can contain a maximum of 68 characters. A PNR can contain a maximum of 127 OSI elements.

Basic Entry: **OS QR VIP COMPANY PRESIDENT**

Explanation:

OS	Transaction code
QR	Specified airline specified for the OSI message
VIP COMPANY PRESIDENT	OSI text

SPECIAL SERVICE REQUEST

An SSR (special service request) is an application to an airline to provide a particular facility for A Passenger or passengers. A special service request is made using an SR entry, which generates an SSR element in the PNR and a request message to the airline or airlines Concerned. A PNR can contain a maximum of 127 active SSR elements.

To Create SSR elements for all flight segments in an Amadeus PNR, you enter SR followed by a four-character service code. For example request for vegetarian meal, enter: **SRVGML**

For IATA-Meal Codes Enter: **HE MEAL CODE**

SSR FOR FOID(Form Of Identification)

To create an SSR for a FOID as a passport number, enter **SR FOID QR HK1-PP1234567/P1**
Help page for FOID entry: HE FOID

SSR FOR PASSPORT / IDENTITY CARD INFORMATION(AIPS)

To create an SSR for passport / identity Card information(**AIPS**)
SR DOCS QR HK1-P-GBR-1234567-USA-04FEB67-M-15DEC09-JACKSON/MICHEL-H/P1

Help page for AIPS entry: HE DOCS

FREQUENT FLYER:

Many airlines offer frequent flyer programs to passengers who travel often on their airline.
These programs vary from airline to airline, each offering special features to their frequent flyers. Each frequent flyer is assigned an individual identification number. Some airlines maintain a database with frequent flyer records in Amadeus containing the following information:

1- Passenger Family Name and Given Name or Initial
2- Frequent Flyer Identification Number
3- Frequent Flyer Priority Number.

To display the table of airlines that have agreements, enter: **VFFD**

You can use transactions for frequent flyer passengers:

To display the name of a passenger as it is stored in the frequent flyer database of an airline, Enter: **FFD**

To create a name element and enter a frequent flyer SSR FQTV element for mileage accrual, enter: **FFA**

If the name element for the frequent flyer has already been entered in the PNR and you only want to enter the **SSRFQTV** element for mileage accrual, enter: **FFN**

Creating a Frequent Flyer SSR Element Only:

FFN (Airline Code)-(Frequent Flyer Account Number)

This entry creates an **SSR FQTV** for a name element that is already in the PNR. When there is more than one name element in the PNR, passenger association is mandatory in the entry. **FFNQR-123456789/P1**

Explanation:

FFN	Transaction Code
QR	Airline code
-123456789	Dash followed by the frequent flyer number
/P1	Slash followed by passenger name element number

Manual entry: **SRFQTVQR-QR123456789/P1**

ADVANCE SEAT REQUEST

An advance seating request is an application to an airline to reserve specific seating at booking time for a passenger or passengers. Advance seating request entries can only be made for flight segments with one of the following status codes -- **HK, RR, KK, TK, LK, SS**. A PNR can contain a maximum of 127 seating SSR elements.

Basic Seat Request - Non-smoking:

To make a basic request for a non-smoking seat, enter: **ST**

Basic Seat Request – Smoking:

To make a basic request for a smoking seat, enter: **ST/S**

To specify a preferred part of the aircraft, add one or more of the following area codes

W	Window
A	Aisle
B	Bulkhead

To request smoking window, enter: **ST/S/W**
To request specific seat number, enter: **ST/R/12A**

Seat Map Display:

The display seat map entry shows the layout of the aircraft cabin for a particular flight and class. This is used to facilitate advance seating requests.

Seat Map for PNR Flight Segment:

To display seat map for segment 8, enter: **SM8**

Explanation:

SM	Transaction Code
8	Flight Segment Number

OPEN FLIGHT SEGMENTS

Enter an open segment, instead of booking an air segment, when you do not know all the details of a passenger's flight plans but you still want to complete, price and ticket the itinerary. In the open segment, you can specify the departure and arrival cities. If the departure date is specified, it will be printed on the ticket. Flight number is required for open segment. Entry: **SOBAC25NOVLHRJFK**

Explanation:

SO	Transaction Code
BA	Airline Code
C	Class of Service
25NOV	Departure date (optional). Departure date is mandatory if it is the first segment to be ticketed.
LHR	Departure City
JFK	Arrival City

ARRIVAL UNKNOWN - ARNK

An arrival unknown segment is an information segment you enter in the PNR to maintain segment continuity. Arrival unknown means that the method of transportation from the destination of one segment to the origin of the next segment is not known or the arrival city
Of the previous segment does not match the departure city of the next segment in the itinerary, or the arrival is by unspecified transport, **Entry: SIARNK**

If you know the arrival date, you can add this to your entry. **SIARNK16MAY**

Explanation:

SI	Transaction Code
ARNK	Arrival Not Known Indicator
16MAY	Arrival Date (Optional)

RECONFIRMING BOOKING

You can reconfirm a segment that was originally booked in Amadeus. You can only use this entry for segments with confirmed status codes. Enter, for example: Entry: **3/RR**

Explanation:

3/	Segment Number, Followed By Slash
RR	Status Code for Reconfirmed Segment

Note : **Please Check Line Number before Reconfirm Segment**

PRINTING

To print currently displayed PNR or 1st screen on local printer press print screen button on your key board or press **CTRL + P** . To print an existing PNR on default printer, enter the print transaction code **WR** followed by either an A (All) or S (Screen).

-	**WRA**	Prints the entire PNR
-	**WRS**	Prints the first screen of the PNR

The Retrieval Entry: **WRA/RT** (Entire Currently Displayed PNR - Whole PNR)
WRS/RT (Currently Displayed PNR - 1st Screen)

OPTIONS

Display Basic Itinerary	**IBD**
Extended Itinerary	**IED**
Print Basic Itinerary	**IBP**
Print Extended Itinerary	**IEP**
Print Joint Extended Itinerary	**IEPJ**

MINIMUM CONNECTING TIME:

The **DM** transaction shows the minimum time passengers must allow making a connection between flights at an airport or city. For information about connections between terminals and airports at a multi-airport city, enter **DM** followed by the City Code and (Optionally) a date.

DM LON
DM LON /15DEC02

For Example: **DM CDG**

Response:

```
CDG Standard Minimum Connecting Times
CDG-CDG  FROM    -      TO
                                                    D/D    D/I   I/D  I/I
CC FLTN-FLTR ORGN EQPTM-CC FLTN-FLTR DEST EQPTM HMM    HMM   HMM  HMM
                                 1-              115   115  115   115
                                2A-               115   115  115   115
```

D/D	Transfer Type - Domestic/Domestic
D/I	Transfer Type - Domestic/International
I/D	Transfer Type - International/Domestic
I/I	Transfer Type - International/International

HMM	H = Hours, MM = Minutes

To display the minimum connection times between two airports, include both airport codes in your dm entry. For example**:** **DM LGW -LHR**

To specify the arrival terminal of the inbound flight, enter, for example:

DM CDG 2A

To specify the departure terminal of the outbound flight, add a dash (-) before the Terminal number. Enter, for example: **DM CDG -2B**

To specify both arrival and departure terminals, enter:

DM CDG 2A -2B

To display the connection times that apply between flights of two specific airlines at a specific airport, include the Airline and airport codes in your dm entry as follows:

DM AF / CDG / LH

SPLITTING PNR

If you want to modify A PNR that has already been stored, you will need to split it. As the word split implies, you then create two separate PNRS, the original or parent PNR, and the associate PNR.
You split a PNR when you wish to rebook a separate itinerary for one or more passengers. In so doing, you separate them from the original PNR, because all passengers in a PNR must have identical flight itineraries.

The procedure to split a PNR consists of the following steps:

1. Enter the transaction code **SP** followed by the number of the name element to be split., To split multiple names, enter the transaction code **SP** followed by the individual name element numbers or a range of name element numbers. The system displays a PNR for the name elements that you have just split. This PNR is temporarily identified as the *Associate PNR*.

2. Enter a received from element (RF) for the associate PNR.
3. Make the end transaction and file entry (EF) on the associate PNR. The system displays the original PNR with the temporary identifier *Parent PNR*.
4. Enter a received from element (RF) for the parent PNR.
5. End transaction (ET) on the parent PNR.

Steps:

1- **SP3 or SP3,4**
2- **RF Zafar**
3- **EF**
4- **RF Zafar**
5- **ET**

HISTORY

Every PNR that is created in the Amadeus central system has associated historical information. The historical information is a record of the creation of the PNR and of any additions, modifications, Cancellations and deletions that are subsequently made to it. The system updates PNR history at each end of transaction entry.

The PNR header line appears at the top of the history. Subsequently, each activity in the PNR is listed as a numbered element. The number for each element indicates when that activity was performed. Activities that are associated with the creation of A PNR are numbered 000, activities from the first retrieval of the PNR are numbered 001, from the second retrieval 002, and so on. Each retrieval and set of modifications is called a step.

Example:

```
000 ON/BLAKE S/MS JACKSON M/MR STOYLE D/MR
000 OS/LH 401 F 20SEP 5 JFKFRA LK3 530P 715A+1/NN *1A/E*
000 OS/CAR SK NN1 FRA 20SEP-21SEP ECAR/CF-/NN
000 RF-PAX CR-MUC1A0701 SU 0001AA 28FEB/1009Z
```

When an element is modified, cancelled or deleted, it appears in history with two numbers.

Example: **001/003 CS/NW1799M 10DEC 4 MIADEN HK4 1315 1705/KK**

The first number (001) indicates the stage at which the item was originally entered in the PNR. The second number (003) indicates when the modification, cancellation or deletion was made.

To display the entire history of the current PNR, without queue history, enter: RH

You can choose to display a partial PNR History:

RHA	Air Segments
RHN	Name Elements
RHG	General Facts (SR, SK, OS)
RHQ	Queue
RHI	Itinerary Segments
RLH	Record Locator

QUEUES

It is very important that you work your queues regularly. You can use queues to do the following:

- **Simplify your work environment**
- **Organize your workload**
- **Send PNRS and messages to queues in your office and to branch office queues**
- **Work on PNRS and messages that require further action**

PNRS may require further action for the following reasons:

- **Segments, services, options, or seats from a waitlist have not yet been confirmed.**
- **The office responsible for the PNR has changed.**
- **There has been a change in the flight segment.**
- **There has been a change in the ticketing arrangement.**
- **The ticketing time limit has expired.**
- **There has been a change in the group PNR.**

Each airline and travel agent is provided with a queue bank for automatic placement of PNRS and messages.

The Following Queues available in Amadeus:

0	**-**	**General**
1	**-**	**Confirmation**
2	**-**	**Waitlist Clearance**
3	**-**	**Options**
4	**-**	**Responsibility Change**
5	**-**	**Rates**
7	**-**	**Schedule Change**
8	**-**	**Ticketing/Time Limit**
9	**-**	**Other Airline Control**
12	**-**	**Expired Time Limit**
23	**-**	**Request for Reply**
25	**-**	**Multi list PNRS**
26	**-**	**Multi list PNRS**
80	**-**	**Prepaid Ticket Advice**
87	**-**	**Group PNRS**
94	**-**	**Message - Customer Profiles**
96	**-**	**Message - Past Date Records**
97	**-**	**Message**

You can request a queue count display for:

QT - A Queue count for all queues, categories, and date ranges, with active PNRS or messages.

QTQ - A Summary Queue count for all activated queues.

To start processing queues in the queue bank, enter: **QS**

You must include the queue number in your entry. You can also include:
A specific category and date range to start processing after making a QS entry,

You can perform the following entries:

QV	Display a list of PNRS on specific Queue
QN	Deletes the PNR / MSG and displays the next one
QI	Ignores the PNR / MSG and exits the queue
QD	Delays the PNR / MSG to the delay queue and displays the next one
QF	Ends transaction on the PNR and exits the queue
ET	Ends transaction on the PNR and displays the next PNR
QE	Places a PNR/ MSG on queue
QM	Places a PNR / MSG on multiple queues
RT	Redisplays PNR if screen is cleared
QU	Redisplays message if screen is cleared

The following entries to sorting queue:

Specific queue number	**QS8**
Specific queue number and category number	**QS8C1**
Specific queue number, category number, and date range	**QS8C1D1**

To remove the current PNR or message from the queue, enter: **QN**

After you make a QN entry, the system displays the next PNR or message. To end transaction on a PNR before removing it from the queue, use the ET entry instead of QN.

To exit the queue, enter: **QI**

For message queues only, to remove the current message and exit the queue enter: **QNF**

Placing the PNR on specific queue:

Specific Queue	**QE40**
Specific Office	**QE/DOH1A0980/40C1**

Sending Message through Queue to Amadeus user:

```
>QE/DOH1A0980/97        (Use Tab Key for Next Line)
 This is a test message from Training Room
  Please ignore it…….. Free Flow Text
  REGARDS //       (Enter)
```

Travel Information –TIF

You can use two different formats to find information in guided mode. You can use a four-letter Transaction or **TI/**, followed by the full Word for the information you need:

TIFV	-or-	TI/Visa	Visa Information
TIFH		TI/Health	Health Information
TIFA		TI/All	Visa and Health Information

For Visa Information, Enter: **TIFV**

System Response:

NA
AR
DE
TR

Where:

NA Passenger's Nationality	(Enter a Country Code or City Code in the Country)
AR Alien Residents	(Enter the Country Code of Current Residence)
DE Destination Point (s)	(Up To Ten Airport Codes)
TR Transit/Transfer Points	(Up To Ten Airport Codes)

Note: Move the Cursor with Help of Aero keys and type information as per field will get Travel information for move down next page Type **MDTI**.

AMADEUS FARE QUOTE

Amadeus Fare Quote entries are divided into two types of transactions:

- **FQ** The Fare Quote transaction display information based on the data contained in an entry. No PNR requires.
- **FX** The itinerary pricing for specific itinerary a PNR requires.

Transaction code for Display Fare:	**FQD**	(No PNR require)
Transaction code for Price Itinerary:	**FQP**	(No PNR require)
Transaction code for Price Itinerary and No Ticket Record / image saved:	**FXX**	(PNR require)
Transaction code for Price Itinerary and Ticket Record / image saved:	**FXP**	(PNR require)

Fare Quote follow- up Entries:

Entry	Requests	PNR	Main/Follow-up
FQA	IATA rate of exchange	**No**	Main entry
FQC	Convert currencies	**No**	Main entry
FQB	Bankers rates	**No**	Main entry
FQM	Mileage calculation	**No**	Main entry
FQO	Mileage with published global routes	**No**	Main entry
FQX	Excess baggage charge calculations	**No**	Main entry
FQD	Fare display	**No**	Main entry
FQS	Booking code information	**No**	Follow-up entry
FQN	Fare note	**No**	Follow-up entry
FQK	Fare breakdown	**No**	Follow-up entry
FQR	Fare routing	**No**	Follow-up entry
FRM	Extra mileage surcharge band	**No**	Follow-up entry
FRC	Convert fare display amounts to another currency	**No**	Follow-up entry
FQP	Informative pricing	**No**	Main entry
FQQ	Fare components of a quoted fare (after FQP)	**No**	Follow-up entry
FQU	Calculate fare combinations (after FQP)	**No**	Follow-up entry
FQE	Encode and Decode corporate contracts (negotiated fares)	**No**	Main entry
FQF	Display fare note from fare driven availability	**No**	Follow-up entry
FQZ	Passenger facility charges information	**No**	Main entry
FQL	A list of all existing fare request type codes, and passenger type codes	**No**	Main entry

ITINERARY PRICING

Entry	Requests	PNR	TST Creation
FXP	Itinerary pricing	**Yes**	**Yes**
FXX	Itinerary pricing	**Yes**	**No**
FXT	Select and stores the fare with the PNR when multiple fares are offered (as a follow-up entry after **FXP/FXX**)	**Yes**	**Yes**

AIS FOR FARE QUOTE

You can find relevant information for Fare Quote in the Amadeus Information System (**AIS**).

Subject	Displays

LN	FARE BASIS	OW	QAR	RT	B	PEN	DATES/DAYS	AP	MIN	MAX	R

The following table explains the above you can find in the international fare display:

Header	Contains
LN	Line number
FARE BASIS	Fare Basis The fare basis code can give you information about the type of fare, type of passenger, class of travel, minimum and maximum stay, reservation restriction, seasonality, and days of travel. A special character before the fare basis indicates the following: * An asterisk indicates a future effective date. The fare is valid for travel on or after the effective date. - A dash indicates same day effective date.) A closed bracket after the fare basis indicates that the fare is valid in one direction only / Constructed fare.
OW	One-way fare
QAR	Currency code

Exercise

1) What is your entry to obtain a fare display for fares from Doha (DOH) to Frankfurt (FRA) on Emirates (EK), Valid on .....?

---

2) What is your entry to obtain a fare display from Doha (DOH) to London (LON), using the shopper option, and specify a range of travel Commencement dates from .....to .....?

---

3) Request round trip fares from Doha (DOH) to London (LON), specifying the 3 carriers Qatar Airways (QR), British Airways (BA) and Gulf Air (GF).

---

4) Request a fare Display from Doha (DOH) to Paris (PAR) for Qatar Airways (QR), with fares sorted from low to high.

---

5) Request fares between Doha (DOH) to New York (NYC) with British Airways (BA), for current date. What is the entry to display the rule for the fare on the line 4?

---

6) What is the entry to display the List of all the rules for the fares on the line 4?

---

7) From the Above FQD display the rule attached to the fare on line 4, requesting the Child Discount Paragraph only?

---

8) Display fares from Miami (MIA) to Atlanta (ATL) for Delta Airline (DL). How many routings apply on this sector? Can you stop in FLL and PBI?

---

9) What is the difference between Routing fares (R) and Mileage Fares (M)?

---

10) Request a shopper display from Paris (PAR) to Santiago (SCL). Display the surcharge Band from the first Mileage fare. How much will be the base fare if you stop somewhere and the distance of the whole journey exceeds the MPM 10%?

---

11) Display Qatar Airways (QR) fares from Doha (DOH) to Paris (PAR), what is the Return booking code of the fare YEE3M? If you use the QR fare and fly Part of the itinerary with Emirates (EK), what will be the booking code for the EK flight?

_____

12) Request a shopper display from Bangkok (BKK) to Singapore (SIN). How much is the lowest Fare in USD?

_____

13) Calculate Excess Baggage Amount From Doha (DOH) to Amman (AMM) for 30kgs Excess Baggage?

_____

Answers & Suggested Entries

1) FQD DOHFRA/AEK/D20DEC

2) FQD DOHLON/S/D15DEC**30DEC

3) FQD DOHLON/IR/AQR,BA,GF

4) FQD DOHPAR/AQR/IX

5) FQD DOHNYC/ABA and FQN4

6) FQN4*LI

7) FQN4*CD

8) FQD MIAATL/ADL – FQR08 – YES

9) Routing Fares indicate exactly which intermediate points are valid for Travel. Mileage Fares allow travel between 2 points with the MPM (Maximum Permitted mileage) without increase, or up to 25 percent increase in fare and mileage when exceeded. The intermediate points are not specified for mileages fares.

10) FQD PARSCL/S – FRM10

11) FQD DOHPAR/AQR – B class on QR, - FQS/AEK , V class on EK

12) FQD BKKSIN/S – FRC1

13) FQX DOHAMM/30

INFORMATIVE PRICING

The Amadeus Informative pricing transaction **FQP** is a fare calculation tool, which allows you to estimate the fare for an itinerary. This is especially useful at times when you need to find the price for an itinerary, but you are not yet ready to make a reservation.

You must use Airport codes, rather than City codes, so that the system can calculate the appropriate taxes. If you prefer, you can create a mask, and let the system guide you through different options. You can calculate discount fares, including cumulative discounts.

The following conditions apply:

- You can use **FQP** for all fares except Group fares and air passes.
- **FQP** is applicable for past date fares up to seven days in the past for the US and Canada, three months elsewhere, and twelve months into future, which in the Amadeus system is **361 days** (12months).

JOURNEY TYPE LIMITS:

Journey Type	Limits
A round or circle trip can contain a maximum of:	12 flight segments, or 10 flight segments and 2 surface segments, or 11 flight segments and 1 surface element, or 11 fare break points
A one-way trip can contain a maximum of:	11 flight segments, or 9 flight segments and 2 surface segments, or 10 flight segments and 1 surface segment, or 10 fare break points

If you do not enter any specific options to your entry, the system makes the following assumptions:

- An adult passenger type.
- The current date for the first segment, and an open date for all the other segments
- An open booking class. The system displays the lowest possible price for each class.
- **YY** fares for travel agencies, and carrier specific fare for airlines.
- Stopover all the cities.

You can perform informative pricing on an itinerary by entering the transaction code **FQP**, followed by a City pair, or several City pairs.

To request informative pricing for the itinerary **DOH** to **CDG**, enter: **FQP DOH CDG**

System Response:

```
FQP DOHCDG
 * FARE BASIS *  DISC    *  PTC       * FARE<QAR>  * MSG   *T
01 F          *          * 1          *   9530.00  *RB    *Y
02 C          *          * 1          *   7200.00  *RB    *Y
03 Y          *          * 1          *   6060.00  *RB    *Y
>                                                   PAGE  1/ 1
```

The system returns a list of fares.

The following table describes the headings in the display

Heading	Explanation
FARE BASE	The fare basis code column
DISC	Discount code column
PTC	Passenger type column Note: In this example, 1 refers to an adult fare. When you request a discount , 1 is the first discount requested and the adult fare is not displayed.
FARE	Fare column
MSG	Message Column The message column can contain the following codes: RB Reservation booking designator RE Reservation Conditions RO Booking Designator Override SR Sales Restrictions FL Flight Number Restrictions FQ Frequency
T	Tax indicator column This column indicates if tax is included. The codes you can see are: Y Tax included N Tax not included E Exempt of tax

To view of the components of the fare on **line 3,** enter: FQQ 3

System Response

```

QAR  6060.00
```

STOPOVERS, TRANSFERS, AND SURFACE SEGMENTS

The system considers all cities you enter in an informative pricing transaction as stopover points, unless you actually specify a stopover point. The all preceding cities will become transfer, or no stopover points. The stopover indicator is a dash (-) and you include it after the stopover city. For example **FQP DOH MUC PAR FRA LON DOH**

Response:

```
FQP DOH MUC PAR FRA LON DOH
 * FARE BASIS *  DISC    *  PTC       * FARE<QAR>  * MSG  *T
01 F          *          * 1          *  16980.00  *RB   *Y
02 C          *          * 1          *  12570.00  *RB   *Y
03 Y          *          * 1          *  10550.00  *RB   *Y
*ATTN CHANGE TO NO STOPOVER MAY VARY FARE
```

The system informs you that you can request other fare types by indicating a stopover point.

Compare the difference of results by designating **Paris, Frankfurt**, and **London** as the point of stopover. Include dash after the city code PAR, FRA and LON.For example: **FQP DOH MUC PAR- FRA- LON- DOH**

Response :

```
FQP DOH MUC PAR- FRA- LON- DOH
 * FARE BASIS *  DISC    *  PTC       * FARE<QAR>  * MSG  *T
01 F          *          * 1          *  16970.00  *RB   *Y
02 C          *          * 1          *  12560.00  *RB   *Y
03 Y          *          * 1          *  10540.00  *RB   *Y
04 YEE3M      *          * 1          *   6770.00  *RB   *Y
```

The system immediately offers you a lower price compares if not showing stopover indicator. To look at the fare components of the fare on **line 4,** enter: **FQQ 4**

System Response:

```
FQQ04
04 YEE3M      *          * 1          *   6770.00  *RB   *Y

ITINERARY PRICING

The Amadeus itinerary pricing transactions allow you to price a **PNR**. Depending on which transaction you use, you can choose to store, or not to store the pricing response in **TST**. The itinerary pricing transactions are as follows:

- **FXP** Prices an itinerary, and stores the response in a **TST**.
- **FXX** Prices an itinerary, without storing the response.

The following table contains information on the journey type limits:

Journey Type	Limits
A round or circle trip can contain a maximum of	12 flight segments, or 10 flight segments and 2 surface segments, or 11 flight segments and 1 surface element, or 11 fare break points
A one-way trip can contain a maximum of:	11 flight segments, or 9 flight segments, and 2 surface segments, or 10 flight segments and 1 surface element, or 10 fare break points
One-way or open jaw:	10 fare components (fare break points)
Round trip or circle trip:	11 fare components (fare break points)

The following conditions apply:

- When only one fare is applicable for an itinerary, the system display a ticket image, and stores a **TST** if you are using **FXP** transaction.
- When several fares apply, the system displays a list of fares to choose from.
- When there is only one passenger, the system displays a ticket image.
- When there are several passengers, the system displays a list of passenger and fare details.
- A fare proposed by the system is valid until you do an end of transaction
- The link with the Amadeus Fare server has a limit of three minutes. If you are inactive for longer than three minutes, you will be disconnected. Re-enter a pricing entry
- For selected markets, when the amounts of fares offered are equal, carrier specific fares take precedence over **YY** fares.
- The system prices an itinerary in the currency of the country of origin, and automatically converts in to the currency of your terminal location when needed.
- When you choose to store a **TST**, remember that the validity of the **TST** varies, depending on your location. The **TST** validity decided by each market individually, and may be minutes, hours, or days. 4 days validity for Qatar market.

ITINERARY PRICING OPTIONS

You can add options to further define your pricing requirements. The options apply equally to **FXP** and **FXX**. The following option indicators:

Passenger Name Select:

FXP / **P4** (Pricing the itinerary for passenger no 4)
FXP / **P2, 4, 6** (Pricing the itinerary for passenger no 2, 4, 6)
FXP /**P2-6** (Pricing the itinerary for range of passengers 2 to 6)
FXP/ RIN/P2 (Infant travelling with passenger no 2)
FXP / **RCH** /**P4** (Child Discount for passenger no 4)

Pricing for Infant:

FXP / **INF** (Infant Only)
FXP / **RIN** (Infant Discount)
FXP/ RIN/P2 (Infant travelling with passenger no 2)

Pricing for Non Infant:

FXP / **PAX** (Adult and Child)
FXP / **RCH** /**P4** (Child Discount for passenger no 4)

Request Pricing:

FXP /**R CD** (Senior Citizen Discount)
FXP / **R ZZ** (Youth Discount)
FXP/R, LON (Indicate the point of Sale and ticketing as LON)
FXP/ R, LON. DOH (Indicate the point of sale is LON and point of ticketing is DOH)
FXP / **R, ET** (Exempt All Taxes)

Select the Segment:

FXP / **S3** (Price only for Segment 3)
FXP / **S3-5** (Price the Range of Segments 3 to 5)
FXP / **S3, 6, 9**(Price the Segments 3, 6, and 9)
FXP / **S4X** (No Stopover or Transfer Point segment 4)
FXP / **S4X, 6X** (No Stopover or Transfer Point segment 4, 6)
FXP /**S2-4, 6, 8X, 9** (Price for segment 2 t0 4 and 6 are stopover and segment 8 no stopover)

Fare Break Point:

FXP / **B 3** (Fare break point is segment 3)
FXP / **B3 , 7** (Fare break point are segment 3, 7)

Turnaround Point:

FXP / **BT- 4** (Turnaround point is segment 4)

Pricing for Validating Carrier (PFC only):

The format: **FXP/R, VC-QR** (Validating on QR)

FARE QUOTE – ITINERARY PRICING EXAMPLES:

Answers & Suggested Entries

Exercise #1

1) Price the Itinerary Automatically – FXP
2) Select The Fare on Line 03 to Store Ticket Record – FXT03/P1
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L- BEE6MQA1
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #2

1) Price the Itinerary Automatically – FXP
2) Select The Fare on Line 02 to Store Ticket Record – FXT02/P1-2
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-BEE7
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #3

1) Price the Itinerary Automatically – FXP/PAX
2) Select The Fare on Line 02 to Store Ticket Record – FXT02/P1-2
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-BEE7/PAX
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #4

1) Price the Itinerary Automatically – FXP/INF
2) Select The Fare on Line 02 to Store Ticket Record – FXT02/P1-2
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-BEE7/INF
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #5

1) Price the Itinerary Automatically – **FXP**
No fare Available as require **Y2** WE HAVE TO USE BY FORCED OPTION

By forced pricing option - FXP/L-Y2
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #6

1) Price the Itinerary Automatically – FXP/RCH
2) Select The Fare on Line 02 to Store Ticket Record – FXT02/P1
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-BEE7/RCH
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #7

1) Price the Itinerary Automatically – FXP/S2,5
2) Select The Fare on Line 04 to Store Ticket Record – FXT04/P1
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-BEE7/S2,5
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #8

1) Price the Itinerary Automatically – FXP/S2,5/P2
2) Select The Fare on Line 04 to Store Ticket Record – FXT04/P2
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-BEE7/S2,5/P2
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #9

1) Price the Itinerary Automatically – FXP/S2X,4X
2) Select The Fare on Line 04 to Store Ticket Record – FXT05/P1
3) Received From and End Transaction – RFP;ER
4) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-VLE6MQA1/S2X,4X
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #10

1) Price the Itinerary Automatically for DOH-DAC-DOH– FXP/S2,5
2) Select The Fare on Line 02 to Store Ticket Record – FXT02/P1
3) Received From and End Transaction – RFP;ER
4) Update TST with bus segments **DAC-CGP-DAC**: **TTU/T1/S2,3,4,5**
5) Fare calculation override option: TTK/T1/CBUILD
6) Received From and End Transaction – RFP;ER
7) Display the ticket Record (TST) – TQT or TQT/T1

OR

By forced pricing option - FXP/L-KLE6MQR/S2,5
1) Received From and End Transaction – RFP;ER
2) Update TST with bus segments **DAC-CGP-DAC**: **TTU/T1/S2,3,4,5**
3) Fare calculation override option: TTK/T1/CBUILD
4) Received From and End Transaction – RFP;ER
5) Display the ticket Record (TST) – TQT or TQT/T1

Exercise #11

1) Price the Itinerary Automatically for DOH-DAC-DOH– FXP/ZO-25P*FF25
2) Price no priced as per require Y2 for K-Class, we will use by forced option.

OR

By forced pricing option - FXP/L-Y2/**ZO**-25P***FF25**
1) Received From and End Transaction – RFP;ER
2) Display the ticket Record (TST) – TQT or TQT/T1

BEST BUY PRICING

Amadeus Best Buy pricing enables you to price a **PNR** with the lowest available fare for a booked itinerary. It checks for lower fares and availability in lower booking classes or for lower fares in the same booking class as already booked. The system suggests only fares that are applicable to the itinerary and the passenger type. It also checks the rule conditions, such as advance purchase, and minimum and maximum stay requirements.

Best Buy can automatically rebook an itinerary in a lower booking class, by using the highest access. Alternatively, the system can inform you of lower fares without rebooking, to enable you to check if the suggested fare is suitable for the passenger, without changing the **PNR**. You can also choose to store, or not to store the pricing response in a **TST**.

In certain markets, Best Buy checks for lower fares across all cabins of the aircraft, and gives preference to the highest cabin when the same fare applies. In other markets, Best Buy checks for lower fares in the same cabin as the already booked segment. Your local Amadeus Help Desk can inform you about the default for your market.

The Amadeus Best Buy functionality consists of the following entries:

Entry	Explanation
FXB	**Rebook** to the lowest fare if **seat available**, and create a **TST**
FXR	**Rebook** to the lowest fare if **seat available** but **don't create TST**
FXA	**Display** a list of **lower fares** without rebook **PNR**
FXU	**Select fare** after **FXA, rebook**, and create a **TST**
FXZ	**Select fare** after **FXA, rebook**, but not create a **TST**
FXL	**Display lowest possible fare** System also **informs** you about seat **availability**

1- BEST BUY WITH AUTOMATIC REBOOKING: FXB/FXR

You can use the Best Buy entries **FXB** and **FXR** to rebook an itinerary in a lower class. **FXB** creates a **TST, FXR** does not

The following PNR illustrates the Best Buy Function.

```
RP/DOHQR2900/DOHQR2900            AA/SU  28JAN06/1250Z   YU8LQE

```

There is only one passenger in the **PNR**; the system displays a ticket image. If more than one passenger you can view the fare details for any of the passenger by using the **FQQ** entry, for example, **FQQ 3**. Use either the **FXB** or the **FXR** entry to change the reservation and store the **TST**.

If the lowest fare is not available, the system will still display passenger and fare details of the lowest fare, but include the following message at the top of the display:

```
LOWEST SOLD OUT // TRY WAITLIST
>
```

AMADEUS TICKETING

The Amadeus central system allows you to automatically price the air itinerary of a PNR. The automatic pricing entry **FXP** creates a transitional stored ticket (TST) which contains all the information necessary to issue a ticket.

A TST can also be created when pricing is requested before end of transaction on the PNR. The newly created PNR must contain the flight segments and a passenger name.

A maximum of ten TSTS are allowed for each passenger with different portions of the air itinerary. Multiple TSTS must be created with segment association. Ticketing is requested by selecting TST and/or segment numbers when more than one TST has been created.

A display of a TST can be obtained as a result of a TQT entry. Any time a modification is made to the PNR, a PNR change message is automatically appended to the header line of the TST. It is necessary to verify the validity of the TST and remove this message before ticketing is requested.

When the system cannot price the PNR, you must manually create a TST with the TTC entry. The response to this entry is an empty ticket panel.

You can update the ticket panel as follows:

- **You fill in the TST panel fields with the necessary information using guided mode entries, or**

- **You use the format entry to enter information on the command line of the panel or in the PNR.**

A TST that is automatically created by the system is called an AST. A manually created TST is called an MST.

You can print a ticket using transaction code **TTP.**

After the ticket has been issued, Amadeus receives a ticket number message which is stored in the **PNR FA** element. The **TK** element in the **PNR** is automatically changed to **TK** to show that the ticket has been issued.

AREA REPORTING PLANS / BANK SETTLEMENT PLANS

Each time an agency issues a ticket on a given airline, the agency must report the sale to the airline for payment purposes.

To simplify the reporting of sales to the airlines, **IATA** and the airlines have formed reporting plans. Airlines' wishing to participate in the reporting plans given an agreement where they will accept payment from a third party, usually a bank. Bank Settlement Plans (**BSPs**) are sometimes referred to as Area Reporting plans (**ARPs**). In the **U.S**, the reporting plan is called ARC **(Airline Reporting Corporation).**

A **BSP** record exists for each reporting plan and contains all the airlines that participate in the plan. The Service Management Centre maintains the **BSP** record in Amadeus. If any agency does not have a designated ticketing carrier, a **BSP** code must be present in the office profile (field **ARP**). This applies to all offices that can issue tickets. **BSP** procedure are established by **IATA** in Geneva

There is a Plan Manger for each country who administers and overseas the plan within a particular geographical area. The National System or National Distribution System provides **BSP** information to Amadeus. **Gulf BSP** has office in Sharjah (**UAE**).

AREA REPORTING PLAN / BANK SETTLEMENT PLAN

To display the area reporting plan participants for specific country, enter
TGBD-XY (where **XY** replaces the **ISO** country code). **Qatar** is under Gulf Area (**AE**), Enter: **TGBD-AE**

System Response:

```
--BSP/ARP PLAN FOR: AE GULFAREA

UA    UL    UM    US    VS    VV    WY    W5
4L    7D    9W
```

Ticketing Agreement Table

A Ticketing (**T**) / PTA(**P**) / Electronic Ticketing(**E**) agreement table is maintained for each Amadeus Participating carrier airlines, if the airline has provided this information. The purpose of the table is to define interline ticketing, **PT**, and Electronic Ticketing agreements. For example: **TGAD- BA/EK**

System response:

```
--AIRLINES HAVING AGREEMENT WITH: BA
EK  T P E
```

REISSUE TICKET

Before commencing a reissue in Amadeus you will require the new base fare, taxes paid on the original ticket, the breakdown of any new taxes to be collected reissue fee requirements and the total additional collection, if any. If you are unsure of these, Please contact the validating carrier for confirmation.

1) Retrieve the PNR and amend the itinerary. Cancel any segments which are not required.

2) Delete any old TST's using the commands then re-price any unflown segments to be included on this ticket using the FXP entries.

You may have to use the l override if the system will not auto price (eg) FXP/L-QEE4MQR1

3) Amend the TST using the TTK / TTI update command applying the following codes.

R -- Reissue, this is the new base fare (excluding taxes)
O -- Old tax, all taxes paid for on the original ticket are identified with an "O"
X -- New tax, any additional taxes that need to be collected on the new ticket.
T -- Total additional collection (this includes any increase in fare, taxes and reissue fees. If there is no additional collection then this will be zero).
V -- Not valid after dates for all coupons, this is mandatory for a reissue.

STEPS FOR REISSUE TICKET

Following are the steps to reissue a paper ticket

For example ticket issued as:

```

Form of payment for reissue:	**FPO/INV+/INV**	**(No Additional collection)**

Step 7: To issue the ticket Enter: **TTP/T1**

System Response:

```
OK PROCESSED
```

TEMPORARY TICKETING

You can use temporary ticketing mode for:

- **Itineraries with only open segments**
- **Shuttle flights where confirmed reservation are not allowed.**
- **Staff discounts when the flight status is space available.**

The temporary ticketing function allows to create a **PNR** and a **TST**, and to generate a ticket. When the ticket has been issued, the **PNR** is not permanently stored. Since the **PNR** is not stored, you only need to enter the elements that are required for ticketing purposes.

The status codes allowed in temporary ticketing are:

- **HL** and **HN**, shown as **RQ** on the Ticket.
- **HK** and **RR** shown as **OK** on the ticket (**NS** for infant)
- **SA** and **ID** shown as **SA** on the ticket.

Before creating a **PNR** for temporary ticketing, you must enter the temporary ticketing mode with the entry: **TY**

System Response:

```
TEMPORARY TICKET MODE
*TY*
```

The system displays the indicator * **TY** * advising you that you are in temporary ticketing mode.

You can now create the **PNR**. The **TY** record must contain the following information:

- **Passenger name or names**
- **Itinerary with open segments and/or segments with confirmed, requested, or waitlist status.**
- **Form of payment**
- **Validating airline**

When you make a short sell entry from an availability display, append the status code to the segment sell entry: **SS1Y4/HK**

When making a long sell entry, include the status code immediately before the number of passengers:
SSBA302Y19MARCDGLHRHK1

Price the itinerary and insert the ticketing field as per require no need to save the TST. After issue the ticket Ignore the previous work with the help of **IG**.
